

# Pioneer High Income Fund, Inc.

January 31, 2025

Pioneer High Income Fund, Inc. is a closed-end fund that invests for a high level of current income by investing in a portfolio of below-investment-grade bonds and convertible securities. It also seeks capital appreciation as a secondary objective. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. Investments in high-yield or lower rated securities are subject to greater-than-average price volatility, illiquidity and possibility of default. The Fund may invest in insurance-linked securities. The return of principal and the right to additional payments from investments in insurance-linked securities are contingent on the non-occurrence of a predefined "trigger" event that leads to physical or economic loss, such as a hurricane or an aerospace catastrophe. Investing in foreign and/or emerging markets securities involves risks relating to interest rates, currency exchange rates, economic, and political conditions. The market price of securities may fluctuate when interest rates change. When interest rates rise, the prices of fixed income securities in the Fund will generally fall. Conversely, when interest rates fall, the prices of fixed income securities in the Fund will generally rise. Investments in the Fund are subject to possible loss due to the financial failure of issuers of underlying securities and their inability to meet their debt obligations. The Fund may invest up to 50% of its total assets in illiquid securities, which may be difficult to dispose of at a price reflective of their value. The market price of illiquid securities is generally more volatile than that of more liquid securities. Illiquid securities also are more difficult to value, and may restrict the Fund's ability to take advantage of market opportunities. The Fund employs leverage through a credit agreement. Leverage creates significant risks, including the risk that the Fund's income or capital appreciation will not be sufficient to cover the cost of leverage, which may adversely affect the return. In order to maintain required asset coverage levels, the Fund may be required to reduce the amount of leverage employed, alter the composition of the Fund's investment portfolio or take other actions at what might be inopportune times in the market. Such actions could reduce the net earnings or returns to shareowners over time, which is likely to result in a decrease in the market value. These risks may increase share price volatility.

## Fund Facts

CUSIP	72369H106
Symbol	PHT

## Portfolio Characteristics

Weighted Average Life	4.70 Years
Effective Duration	2.63 Years
Current Distribution Rate (on market price)	8.31%

Duration is a measure of the sensitivity of the price (the value of principal) of a fixed income investment to a change in interest rates, expressed as a number of years. Effective Duration (also called option-adjusted duration) is a duration calculation for bonds that have embedded options. Current Distribution Rate is calculated by dividing the last distribution per share (annualized) by market price. It does not reflect return of capital. **The performance data quoted represents past performance, which is no guarantee of future results.**

### Quality Distribution\*

BBB	7.38%
BB	30.21%
B	41.14%
CCC	11.71%
Not Rated	8.07%
Cash Equivalent	1.49%

Rating Description/Source: Credit rating breakdown reflects the average of available ratings across Moody's, Standard & Poor's (S&P), Fitch, DBRS Morningstar and KBRA. Bond ratings are ordered highest to lowest in the portfolio. Based on S&P's measures, AAA (highest possible rating) through BBB are considered investment grade. BB or lower ratings are considered below investment grade. Cash equivalents and some bonds may not be rated.

### Maturity Distribution\*

0 to 2 Years	23.75%
2 to 5 Years	56.72%
5 to 7 Years	9.15%
7 to 10 Years	3.87%
10 to 20 Years	4.65%
20+ Years	1.86%

\* Due to rounding, figures may not total 100%. Portfolio is actively managed and characteristics are subject to change.

### Pioneer High Income Fund, Inc. Offers Investors:

- **High current income potential** – The Fund's managers use a research-intensive credit and issue selection process to carefully select fixed-income securities that they believe will provide the best opportunities for generous yields and attractive returns. The Fund intends to pay distributions on a monthly basis.
- **Experienced management team** – The Fund is managed by one of the industry's most experienced fixed-income management teams who are part of an integrated global team of fixed-income and equity portfolio managers.

### Portfolio Management

Day-to-day management of the Fund's portfolio is the responsibility of Andrew Feltus, Kenneth J. Monaghan and Matthew Shulkin. Mr. Feltus, a Managing Director and Co-Director of High Yield, joined Amundi US in 1994 and has been an investment professional since 1991. Mr. Monaghan, a Managing Director and Co-Director of High Yield, joined Amundi US in 2014 and has been an investment professional since 1983. Mr. Shulkin, a Senior Vice President, joined Amundi US in 2013 and has been an investment professional since 1996.

**Call 1-800-225-6292 or visit [amundi.com/usinvestors](http://amundi.com/usinvestors) for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.**

**Performance data shown represents past performance. Past performance is no guarantee of future results. Investment return and market price will fluctuate, and your shares may trade below net asset value, due to such factors as interest rate changes, and the perceived credit quality of borrowers.**

Total investment return does not reflect broker sales charges or commissions. All performance information is for common shares of the Fund.

The performance information does not reflect the deduction of fees and taxes that a shareowner would pay on Fund distributions or the sale of Fund shares. Had these fees and taxes been reflected, performance would have been lower.

**Shares of closed-end funds, unlike open-end funds, are not continuously offered. Once issued, shares of closed-end funds are bought and sold in the open market through a stock exchange and frequently trade at prices lower than their net asset value. Net Asset Value (NAV) is total assets less total liabilities, which includes preferred shares, or borrowings as applicable, divided by the number of common shares outstanding.**

When net asset value (NAV) is lower than market price, dividends are assumed to be reinvested at the greater of NAV or 95% of the market price. When NAV is higher, dividends are assumed to be reinvested at prices obtained through open market purchases under the Fund's dividend reinvestment plan.
